Twilight Switch

Designed and manufactured in Europe

Fig. 1 – device installed in LED profile - 1 euro coin only for size comparison

Twilight Switch is the world's smallest twilight LED controller for usage in LED application, e.g. in commerce, industrial and home lighting, ambient lighting, automotive industry, emergency lighting, assisted living solutions, etc.

HOW IT WORKS?

Twilight Switch automatically switch on LED light (e.g. LED strip, 12 V DC led fixtures and bulbs) on nightfall and off again at daybreak. It can be installed in LED profiles.
